

**THIS IS THE TITLE OF MY THESIS. IT WILL COME  
OUT IN CAPITAL LETTERS AS REQUESTED**

by

A. Student

A Proposal Submitted to the Honors Council  
For Honors in the Department of Physics & Astronomy

October 16, 2006

Approved:

David Schoepf  
Chair, Department of Physics

# 1 Introduction

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph has a citation [1] that you can see. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

# 2 Significance

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

Where does this go?

This is the equation of a straight line:

$$y = mx + b. \tag{1}$$

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

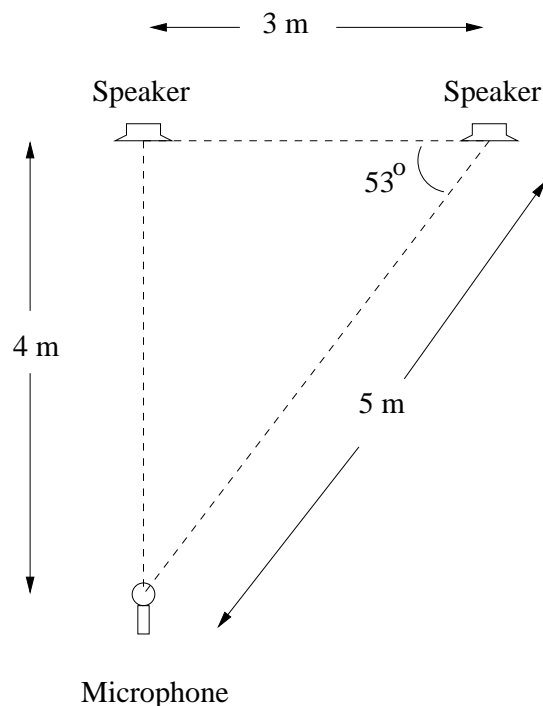

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

Where does this go?

This is the equation of a straight line:

$$y = mx + b. \tag{2}$$

**Figure 1:** This is a figure from PHYS 212 exam 2. I want to see the font used for the caption, and width of lines, etc. I may want to design our own figure environment. Figures not automatically centered either.

necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. Here's a citation [2]. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

with standard margins. I will repeat lines as necessary to make it long enough. This paragraph will be written with standard margins. I will repeat lines as necessary to make it long enough.

Where does this go?

This is the equation of a straight line:

$$y = mx + b. \tag{4}$$
