

CURRICULUM VITAE

MICHELE D. THORNLEY

CURRENT POSITION:

Associate Professor
Department of Physics & Astronomy
Bucknell University
Lewisburg, PA 17837

Email: mthornle@bucknell.edu
Phone: 570-577-3174
FAX : 570-577-3153

EDUCATION:

Ph.D. (Astronomy) May 1997, University of Maryland, College Park. Dissertation: “Dynamical Influences in Flocculent Galaxies: An Examination of Structure and Star Formation”. Advisor: Dr. Lee G. Mundy.

M.S. (Astronomy) December 1994, University of Maryland, College Park.

B.S. (Physics, with Honors) May 1990, University of Puget Sound.

APPOINTMENTS:

- Visiting Astronomer, NAASC, National Radio Astronomy Observatory, July 2009—July 2010.
- Visiting Astronomer, Observatoire de Bordeaux, June 2005.
- Visiting Astronomer, Space Telescope Science Institute, 2003-04.
- Assistant Professor, Department of Physics (& Astronomy), Bucknell University, 2000-present.
- Jansky Postdoctoral Research Fellow, National Radio Astronomy Observatory, Charlottesville, VA, 1998-2000. Academic Host: Dr. Paul Vanden Bout.
- Alexander von Humboldt Research Fellow, Max-Planck-Institut fuer extraterrestrische Physik, Garching bei Muenchen, Germany, 1997-1998. Academic Host: Dr. Reinhard Genzel.
- Graduate Research Assistant, Laboratory for Millimeter-wave Astronomy, Department of Astronomy, University of Maryland, College Park, 1994-1996.
- Graduate Teaching Assistant, Department of Astronomy, University of Maryland, College Park, 1990-1993.

PROFESSIONAL SERVICE:

- Member, Renewing Small Telescopes for Astronomical Research (ReSTAR) Committee, 2007-2008.
- Member, National Radio Astronomy Observatory Users Committee, 2003-2006 (Chair: 2006).

PROFESSIONAL SOCIETIES:

- American Astronomical Society
- International Astronomical Union

RESEARCH INTERESTS:

My research focuses on the development and evolution of large-scale structure in external galaxies, and in particular how that structure is related to the star formation process on kiloparsec scales. My research utilizes observations of external galaxies over a wide range of wavelengths, from radio to optical wavelengths. In particular, I study the morphology and kinematics of molecular gas, atomic gas, and interstellar dust in nearby galaxies, in order to explore their relationship to star formation and the overall distribution of stellar mass in galaxies.

GRANTS

JPL/NASA (ID 1224769/1407), P.I. R. Kennicutt, plus 14 co-investigators: “SINGS: Spitzer Infrared Nearby Galaxies Survey” (2000-2007). From this grant, \$117,500 was allocated to support M. Thornley’s SINGS research at Bucknell.

TEACHING & OUTREACH:

As of the end of the 2008-2009 academic year, my teaching experience includes:

- Nine semesters of Introductory Astronomy (ASTR101/102: two-semester sequence, lecture and laboratory, 80-96 students enrolled per semester.) The laboratory component of this course includes a sequence of night-sky observing labs that incorporate 8-inch Meade LX200 telescopes and SBIG or Meade CCD cameras.
- Six semesters of Introductory Physics (PHYS 211/212: two-semester sequence, laboratory and problem sessions, 25-60 students per semester).
- Two semesters of Electromagnetic Theory I (PHYS 333: intensive problem solving lecture course for physics, engineering and mathematics majors, for 10-12 students each time the course is offered).
- Two semester of Astrophysics (ASTR301/PHYS301, ASTR401/PHYS401: an introduction to astrophysics for junior and senior physics, engineering, and mathematics majors, for 10-15 students each time the course is offered).
- One semester of Modern Optics (PHYS303: upper-division elective course for physics majors, for 5-10 students each time the course is offered).
- One semester of Light & Vision (PHYS142: an introductory lecture and laboratory course for non-science majors, for 14-18 students each time the course is offered.)

In addition, I have been actively involved with Bucknell Observatory public outreach activities, which bring approximately 500-1000 visitors to the Observatory each year. These activities involve biannual Observatory Open Houses, as well as numerous visits by Girl and Boy Scout troops, and local elementary and middle school classes.

SUPERVISED UNDERGRADUATE RESEARCH:

- Esther Chapman, REU student at Bucknell University (2006). Project: “The Relationship of Atomic Gas and Aromatic Emission in SINGS Spirals.”
- Christopher Wolfe*, REU student at Bucknell University (2003). Project: “Candidate protostellar disks in NGC 2071 IRS 1 and IRS 3.” Currently: graduate student at Lehigh University.

- Heather Beck*, REU student at Bucknell University (2003). Project: “Rotation of a H₂O maser disk in Cepheus A.” Currently: graduate student at the University of Virginia.
- Courtney Spohn-Larkins, Buckell Research Student (2002). Project: “Radial Structure in Molecular and Stellar Disks of BIMA SONG Galaxies.” Currently: graduate student at University of Tulsa.
- Richard Magee, SINGS research student (2001). Project: “Nearby Galaxies in the Near Infrared.” Currently: graduate student at the University of Wisconsin, Madison.
- Richard Cool*, REU student at Bucknell University (2001). Project: “Search for H₂O masers in protostellar disks.” Currently: NSF graduate fellow at the University of Arizona.
- Dustin Bambic, REU student at NRAO Charlottesville (1999). Project: “NGC 7331: Examining Density Wave Contributions in Flocculent Galaxies.”
