

# CSCI 245 Life, Computers, and Everything

Are networking technologies  
making us be **alone together**?

What do mobile communication technologies do for you?

Cell phone

Music player

Camera

Internet

# The iPhone

## Apple, 2007

# Social Applications

What do social networking technologies do for you?

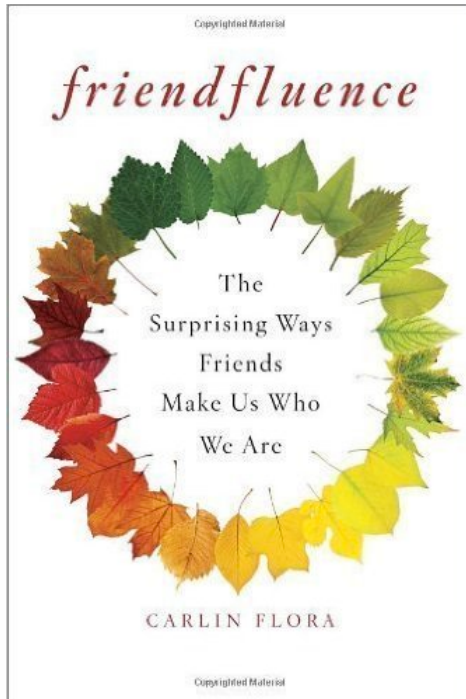

# Dilemma

**How do you develop and nurture a personal or professional relationship that meets your needs?**

- a) Only face to face
- b) Only texting
- c) Only social networking
- d) Face to face plus texting
- e) Face to face plus social networking
- f) Face to face plus texting and social networking
- g) etc.

Cell Phones

# Friendship

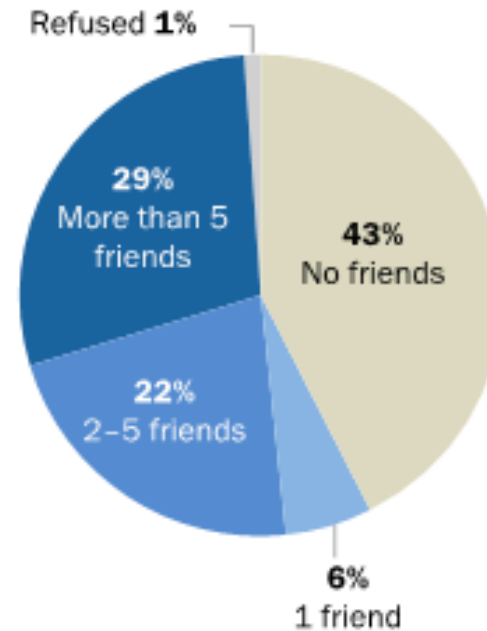

You've also evolved to want **at least one person** in your portfolio **who reads your mind fairly well**. Also worthy are those who want the same things you want. Such people will work to “make the world suitable for themselves,” and thereby for you, too. And finally, you'll tend to fill a friendship slot with **someone who considers you difficult to replace**.

# Social Networks and Friendship

Does the **number of friends** you have in social networks make you feel that you have a large support network?

# Social Networks and Friendship

R.I.M. Dunbar: “In effect, we have **five intimate friends**. Fifteen close friends, 50 good friends, 150 friends.”

Friendfluence: The Surprising Ways Friends Make Us Who We Are), Carlin Flora

[http://www.amazon.com/Friendfluence-Surprising-Friends-Carlin-Hardcover/dp/B00ZT1UVZ4/ref=sr\\_1\\_2?s=books&ie=UTF8&qid=1454954965&sr=1-2](http://www.amazon.com/Friendfluence-Surprising-Friends-Carlin-Hardcover/dp/B00ZT1UVZ4/ref=sr_1_2?s=books&ie=UTF8&qid=1454954965&sr=1-2)

# Social Networks and Friendship

An important feature of natural social networks in both humans and non-human primates is that they are structured into a distinctive series of hierarchically inclusive layers that have a natural scaling ratio of approximately 3. These layers reflect both **interaction frequencies** and, at least in humans, **emotional closeness**. In humans, these layers have values that approximate 5, 15, 50 and 150, and extend beyond this in at least two further layers to 500 and 1500.

# Social Networks and Friendship

“... there is a **cognitive constraint** on the size of social networks that even the communication advantages of online media are unable to overcome.”

*Do online social media cut through the constraints that limit the size of offline social networks? R.I.M. Dunbar, Royal Society Open Science, December 2015.*

# Romantic Relationships

- “People who **struggle with offline relationships** seem to frequently prefer online relationships as a safer medium (Buote, Wood, & Pratt, 2009)”
- “... the use of texting with cell phones can increase intimacy by making partners more available and expanding their repertoire of connection (Henline, 2006).”
- “Research has supported the theory that when individuals have attachment partners who are accessible in moments of high need, they experience lower levels of distress and higher levels of mental resiliency (Mikulincer & Shaver, 2007)”
- **“As communication tools change, it is worthwhile for researchers to be aware of trends in how these tools might affect basic human relationships.”**

Using Technology to Connect in Romantic Relationships: Effects on Attachment, Relationship Satisfaction, and Stability in Emerging Adults. L. Schade, J. Sandberg, R. Bean, D. Busby, and S. Coyne.

<http://dx.doi.org/10.1080/15332691.2013.836051>

“If someone doesn't have time to talk to me, I can text a greeting, and they will know that I am thinking of them, caring about them.”

[http://www.amazon.com/Alone-Together-Expect-Technology-Other/dp/0465031463/ref=asap\\_bc?ie=UTF8](http://www.amazon.com/Alone-Together-Expect-Technology-Other/dp/0465031463/ref=asap_bc?ie=UTF8)

“In fact, being alone can start to seem like a precondition for being together because it's easier to communicate if you can focus, without interruption, on your screen.”

*Alone Together, Sherry Turkle, 2011*

“When people have phone conversations in public spaces, their sense of privacy is sustained by the presumption that those around them will treat them not only as anonymous but as if absent.”

*Alone Together, Sherry Turkle, 2011*

“It is those on the phone who mark themselves as absent. Sometimes people signal their departure by putting a phone to their ear, but it often happens in more subtle ways - there may be a glance down at a mobile device during dinner or a meeting.”

*Alone Together, Sherry Turkle, 2011*
