

Probability and Stochastic Processes

A Friendly Introduction for Electrical and Computer Engineers

Roy D. Yates and David J. Goodman

Errata for the first printing

October 28, 1998

Despite our best efforts to eliminate typographical errors, several have been found. If you find others, please let us know at

ryates@winlab.rutgers.edu or dgoodman@winlab.rutgers.edu

Note that in the following, list, the labels are intended to be read in the following way:

- **Page 4** Line +6 means 6 lines down from the top of page 4.
- **Page 8** Line -5 means 5 lines up from the bottom of page 8.
- **Page 23** Def 1.8, Line +4 means the fourth line of Definition 1.8. Similarly, line numbering within a theorem, problem, or figure caption starts with the first line of that item.

Here is the actual correction list for the first printing:

- **Page xi** Line -8: Starting quotes " should be “.
- **Page xii** Line +11: *Word Wide Web* should be *World Wide Web*
- **Page 19** Theorem 1.10: The words *Law of Total Probability* should be boldfaced
Law of Total Probability
- **Page 23** Line -14 (just preceding Definition 1.8) *mutually exclusive sets* should be *independent events*
- **Page 23** Def 1.8, Line +4: A_{n+1} should be A_n
- **Page 28** Line -6: *for the selecting* should be *for selecting*
- **Page 31** Line +2: $M - N$ bits should be $N - M$ bits
- **Page 38** Problem 1.4.7, Line 3: $i > n$ should be $i > m$
- **Page 61** Line -1: The displayed equation at the bottom of the page should be

$$\sum_{x=1}^{\infty} xq^{x-1} = \frac{1}{(1-q)^2} = \frac{1}{p^2}$$

- **Page 81** Problem 2.2.9: *six tries* should be $n = 6$ *tries*
- **Page 81** Problem 2.3.6: *random variable*, K should be *random variable*, B
- **Page 84** Problem 2.6.6: *geometric random* should be *geometric random*
- **Page 85** Problem 2.7.6: *geometric random* should be *geometric random*
- **Page 85** Problem 2.8.6: In part (a), the repeated statement of the PMF $P_X(x)$ is redundant
- **Page 87** Line -12: *This Chapter* should be *This chapter*
- **Page 96** Line -4: *Corresponding to the Theorem* should be *Corresponding to Theorem*
- **Page 138** Theorem 4.13 Line 3: *and* $\sigma\sqrt{a}$ should be *and* $a\sigma$
- **Page 138** Line -8: *tht* should be *that*
- **Page 148** Theorem 4.18: Part (d) should read $f_X(x_0) = q\delta(0)$.
- **Page 159** Problem 4.1.1: Part (b) should be *What is* $P[-1/2 < X \leq 3/4]$.
- **Page 161** Problem 4.4.11: The difficulty should be ♦♦
- **Page 171** Line 8: The displayed equations marked (Figure 5.2b), (Figure 5.2c), and (Figure 5.2d) have the wrong integral limits. The three equations should read

$$F_{X,Y}(x,y) = \int_0^y \int_v^x 2 du dv = 2xy - y^2 \quad (\text{Figure 5.2b})$$

$$F_{X,Y}(x,y) = \int_0^x \int_v^x 2 du dv = x^2 \quad (\text{Figure 5.2c})$$

$$F_{X,Y}(x,y) = \int_0^y \int_v^1 2 du dv = 2y - y^2 \quad (\text{Figure 5.2d})$$

- **Page 199** Problem 5.8.3: In part (a), *function?* should be deleted
- **Page 200** Problem 5.8.7: The problem should start with *Consider random variables X , Y , and W from ...*
- **Page 200** Problem 5.9.3, Line +2: $\text{Var}[y]$ should be $\text{Var}[Y]$
- **Page 200** Problem 5.10.2, Line +1: *Let XX_1, \dots, X_n* should be *Let X_1, \dots, X_n*

- **Page 270** Theorem 8.6, Line +1: Theorem 8.6 should start *If X has finite variance, then for any constant c ...*
- **Page 270** Line +5: *Theorem 8.6(a)* should be *Theorem 8.6*
- **Page 270** Line +6: The displayed equation should read

$$P[|M_n(X) - \mu_X| \geq c] = 1 - P[|M_n(X) - \mu_X| < c]$$

- **Page 276** Problem 8.2.2, Line +3: *X is within k standard deviations of ...* should read *X is more than k standard deviations from ...*
- **Page 276** Problem 8.2.3, Line +3: *standard deviations of ...* should read *standard deviations from ...*
- **Page 312** Theorem 9.4 Should start: *If X has finite variance, then the sample mean ...*
- **Page 317** Problem 9.2.1: λ_0 and λ_1 should be α_0 and α_1
- **Page 317** Problem 9.3.1, Line -3: *What is the acceptance region* should be *What are the acceptance regions*
- **Page 318** Just preceding the figure in Problem 9.3.2, s_{111} should be \mathbf{s}_{111}
- **Page 318** Problem 9.3.6: In part (a), *Sketch the decision regions* should be *Sketch the acceptance regions*
- **Page 318** Problem 9.3.7, Line -2: *when $\sqrt{E} = 1$, and ...* should be *when $\sigma = 0.8$, $E = 1$,*
- **Page 319** Problem 9.4.2, part (b): $\hat{X}_M(y)$ should be $\hat{x}_M(y)$
- **Page 319** Problem 9.4.3 part (c): $\sigma_{X,Y}$ should be $\text{Cov}[X, Y]$
- **Page 319** Problem 9.4.3 part (e): *pmf* should be *PMF*
- **Page 319** Problem 9.4.3 part (g): $e_{\text{MMSE}}(-3)$ should be $\hat{e}_M(-3)$
- **Page 319** Problem 9.4.4 part (b): $\hat{u}(V)$ should be $\hat{U}_L(V)$
- **Page 319** Problem 9.5.1: The displayed equation should read

$$f_V(v) = \begin{cases} 1/12 & -6 \leq v \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

- **Page 324** Table 10.1, line +7: *hline* $\cos 2\pi f_0 \tau$ should be $\cos 2\pi f_0 \tau$

- **Page 326** Theorem 10.1 Proof, Line 3, Line 5, Line 8: each instance of $R_Y(t, t + \tau)$ should be $R_Y(t, \tau)$
- **Page 332** Line -14, Line -9, Line -8, Line -7: each instance of $R_Y(t, t + \tau)$ should be $R_Y(t, \tau)$
- **Page 332** Lines -12 and -11: $R_{NX}(t, t + \tau)$ should be $R_{NX}(t, \tau)$
- **Page 332** Lines -12 and -11: $R_{XN}(t, t + \tau)$ should be $R_{XN}(t, \tau)$
- **Page 333** Theorem 10.6, Line +3: $R_{XY}(t, t + \tau)$ should be $R_{XY}(t, \tau)$
- **Page 333** Theorem 10.6 Proof, Line +3: $R_{XY}(t, t + \tau)$ should be $R_{XY}(t, \tau)$
- **Page 339** Quiz 10.5, Line 3: $R_Y(t, t + \tau)$ should be $R_Y(t, \tau)$
- **Page 342** Problem 10.1.1, Line +3: *IS* should be *Is*
- **Page 342** Problem 10.2.1: Parts (a) and (b) should be reversed.
- **Page 343** Problem 10.4.1, Line +2: $C_X(t, t + \tau)$ should be $C_X(t, \tau)$
- **Page 378** Theorem 11.25: In the displayed equation, $R(t)$ should be $R_j(t)$.
- **Page 387** Theorem 11.30: In the displayed equation, in both the numerator and denominator of the right side, the starting index $j = 1$ should be $j = 0$
- **Page 387** Line -1: *aGeneral* should be a *General*
- **Page 392** Problem 11.1.2, Line 3: In the displayed equation preceding part (a), the denominator on the right side should be $j!$ instead $n!$
- **Page 394** Problem 11.4.1: The ● difficulty symbol is missing
- **Page 394** Problem 11.8.1: The ● difficulty symbol is missing
- **Page 394** Problem 11.8.3, Line -5: (*measured in minutes*) should be (*measured in seconds*)
- **Page 394** Problem 11.8.3, Line -4: *2 minutes* should be *120 seconds*
- **Page 394** Problem 11.9.1: The difficulty should be ■ instead of ♦
- **Page 395** Problem 11.11.6: The final sentence should read *Find the limiting state probabilities for this queue when the arrivals are Poisson with rate λ and service times are exponential with mean $1/\mu$.*
