

Daily Assignment #3

(due: Tuesday, February 1, 9:30 am)

1. Finish the C++ In Class Work 3. and 4. As answer to this question please send me the complete pathnames of your programs and give me the permission to read them (`chmod a+r filename`).
2. In case you got on Thursday already started on the C++ In Class Work 5., then finish it. As answer to this question show me a picture of your Mandelbrot set.
3. Have a look at arrays with C++ and also how to use arrays as parameters of user-defined functions. (I do not need an answer to this part of the daily assignment.)
4. **Comments:** Do you have any comments about last class and/or this assignment? What was most interesting and/or most difficult? (In case you would like me to spend more time on a specific topic, please let me know as soon as possible, so that I can plan our Tuesday class accordingly.)
