

Daily Assignment #7

(due: Tuesday, February 15, 9:30 am)

1. Finish the DLA program, i.e. 3. of the fractal growth in class work.

(As answer to this assignment send me the complete pathname of your working program and give everybody read permission).

2. Tuesday we will determine the fractal dimension for the DLA. As preparation read in the textbook pages 452-454.

3. On March 1 will be your first paper due. The background reading and understanding of your model will take a lot of time. Therefore get started by

3a. having a look at the hand-outs about your project papers. Read “Paper” and “On Preparing a Manuscript For Publication”. Skim the other two papers. They serve as examples.

3b. beginning to write.

I do not need an answer to this assignment. Please feel free to ask though in case you would like any help.

4. Update your bibliography and hand in your revised bibliography. This version together with your first version will be graded.

5. What of the last class and this assignment did you find most interesting and/or most difficult?
