

## Daily Assignment #9

(due: **Tuesday, February 22, 9:30 am** )

For this assignment no answers are required. It is however important that you work on 1. and 2. as preparation for Tuesday class and to keep on track with your own project. As always I appreciate your answers to 3.

1. On Tuesday we will start a new section: Nonlinear-Dynamics. As preparation read in our textbook pages 128 – 146. You may skip the text of all programs and all problems, and you may only skim §6.5 .
2. Continue working on your main project.
3. What of the last class and this assignment did you find most interesting and/or most difficult?
