

## Daily Assignment #1

(due: Tuesday, January 25, 9:30 am )

**Read:** Course Information & Chapter 1 of Gould & Tobochnik

1. Do you have any questions about the course?
2. Start looking for the topic of your project. You will present on Tuesday in class your first ideas and findings. (Use the web of science etc. for your search.) Your written answer to this question can be in the form of keywords.
3. On Tuesday we will dive into writing C++ programs. Prepare for the class by looking up how one reads in and prints out data. Read also about algorithmic calculations and repetitions. To answer this question and for the rest of the class, You may use any C++ book (the library has many) or any on-line manual. As answer to this question list the main commands.
4. **Comments:** Do you have any comments about last class and/or this course in general?
