

Daily Assignment #2

(due: Thursday, January 27, 9:30 am)

1. Finish the Unix-Exercises. Of the Advanced Unix-Exercises only 1.– 4. will be important for now. There is no need for you to hand me answers to this part of the daily assignment.
2. Finish the C++ In Class Work 1. – 2. As answer to this question please send me the complete pathnames of your programs and give me the permission to read them (`chmod a+r filename`).
3. Have a look at decision statements with C++ and read also about functions. (I do not need an answer to this part of the daily assignment.)
4. Work on 3a. of the C++ In Class Work. Send me the complete pathname of your program and give me read permission.
5. **Comments:** Do you have any comments about last class and/or this assignment? What was most interesting and/or most difficult? (In case you would like me to spend more time on a specific topic, please let me know as soon as possible, so that I can plan our Thursday class accordingly.)
