

Daily Assignment #2

(as email due: Thursday, January 24, 8:30 am)

- 1.** If you are a newcomer to programming, finish the in class work 1. & 2. If you are more advanced, finish the in class work 2. Copy your programs into your share.dir directory and make them readable as described in 2d. In case you finish this question early, please let me know, so that I can have a look at your programs as soon as possible.
- 2.** Read about repetitions, decisions, and user-defined functions in C++. As answer to this question keywords and/or examples are fine.
- 3.** Keep working on the bibliography/model of your project. I do not need to see an answer to this question but you do have to steadily work on your project.
- 4. Comments:** What of this assignment was most difficult and/or most interesting? Do you have any comments about last class and/or this course?
