

Homework Assignment #11

(as email due: **Thursday, March 10, 8:00 am**)

1. Finish 3b of the in-class work on traffic flow. As answer to this question put your program in your share.dir, make it readable and send to me the filename.
2. **Program for Main Project:** Next task for your main project is to start writing the program for your project. March 29, 8am will be due the first version of the core of your program. To write your program use your flow chart (which was due today, March 8) and also follow the order of tasks into which you have chopped up your main project programming task. (I do not need to see an answer to this assignment, but you should work steadily on this task.)
3. **Comments:** Comments are always welcome.
