First Version of Program

(due: Wednesday, March 21, 5:00 pm)

1. Program for Main Project: Use your flow chart (which was due March 6) and use all notes from your meeting with me on March 7, for the writing of your program. This also includes that you use your notes to decide how to chop up your main project programming task into smaller programming tasks.
To hand in your program:

- send an email to me with the name of your sourcecode (`name.cc`).

- put a copy of your sourcecode (`name.cc`) into your `~/share.dir/` and give me readpermission with `chmod 644 ~/share.dir/name.cc`

where you replace `name` with the name of your program.

Have fun with your programming! Have a nice break!
