

DAILY ASSIGNMENT

Announcement:

Bring to next class:

- Reading *Scientists and the Totalitarian State*
- print out of answers to daily assignment (for Mo-class)
- Course Materials (textbooks and notes) (We will discuss the topic of scientists and the totalitarian state by looking at the lives of already discussed scientists.)

Due: Monday November 1, 9 am

Read: Scientists and the Totalitarian State

1. Summarize the reading Scientists and Totalitarian State. Reflect on what you found interesting and liked or disliked.
2. Pick any scientist (living or dead) who lived in (or escaped) a totalitarian state (or similarly oppressive government). Only constrain is, not to choose anyone of the scientists discussed in detail in the reading (because we want to broaden our information on the topic). Describe for the person of your choice how society influenced their life, how they dealt with the situation, and any other for you interesting information about their life. You will share your findings on Monday in class.
3. What of this reading did you like or dislike (if any)? Do you have any other comments?
