Reading Assignment #14

(due: Wednesday, September 29, 8 am)

**Read:** Taylor pages 247 – 258

1. What does Taylor prove in §7.4? (Phrase the statement which he proves. No need to give the proof itself.)

2. Work already on HW#6 problem 6a. (I do not need to see your solution before Thursday, but I would like you to use the problem to get prepared for our Wednesday class.)

3. **Comments:** What of this reading and last class did you find most difficult and/or what did you find most interesting? What would you like to be discussed on Wednesday in class?
