Reading Assignment #18

(due: Monday, October 8, 8 am)
(my email: kvollmay@bucknell.edu)

Read: Taylor §13.6 & §13.7

1. Work on problem 2. of HW#6.

2. Find examples for the application / importance of Liouville's theorem. To answer this question check books, journal articles, and/or the internet.

3. Comments: What of this reading did you find most difficult and what did you find most interesting? Is there a specific topic you would like to focus on, on Monday in class? Do you have any other comments or wishes?
