

Reading Assignment #7

(due: **Wednesday, September 7, 8 am**)

(my email: kvollmay@bucknell.edu)

Read: 12.5 – 12.8

1. Often “nonlinear dynamics” is used the same as “chaos”. In which sense are they not the same? How are they related? Define chaos.

2. Comments: What of this reading did you find most difficult and what did you find most interesting? Is there a specific topic you would like to focus on, on Friday in class?
