

# Homework Assignment #16

Due Fr, March 24, 5pm, in `~/share.dir` with read permission

## 1. Final Version of Your Main Project Program:

Use my comments to your first version of your main project program which I sent to you as attachment in an email. For some of you, you will also need to continue using your flow chart for finishing your program. The deadline for your second version is March 24, Friday, 5pm. Already on March 30, 5pm first figures, i.e. results, of your main project program will be due.

As always, please feel free to come for questions. Office hours are always M 1-2, WF 1-3pm. Only by trying to finish the program, will you realize what your questions are. I hope that you enjoy this type of puzzle solving. (I do very much, so I am always happy to think about questions/tasks you run into with your project.)

By Fri, March 24, 5 pm, put your python-program in your `~/share.dir/` and give read permission, so

```
cp programname.py ~/share.dir/  
chmod a+r ~/share.dir/programname.py
```

where `programname.py` is your second version of your python-program. You should aim for your final version of your program. Please note that this second version will be graded (in course information for 1st version program).

## Future:

- March 28: Mini-Project II will happen all in class
- March 30: Results (Figures & Interpretation)
