

Homework Assignment #15

Updated Upcoming Schedule and Deadlines:

- **Wed, March 20:** In case you haven't yet, please Sign-Up for individual meeting for your program. (on our webpage is link for this)
- **Thu, March 21:** Regular Class
- **Fr, March 22, 11:50pm:** 2nd Version of Program due. Similar to 1st Version of program copy into your `~/share.dir/` and give read permission with `chmod a+r ~/share.dir/*`
- **Tue, March 22:** 1st Version of Results: Figures or tables, or whatever your results are. Figures do not yet need to be fancy, for example you may label axes just by hand. Hand in as hardcopy the figures, label on the figures what exactly they show, including which parameters you used, and write (key words okay, hand-written okay) the interpretation of the results. To get there, this will most likely need a further revising of your program(s).
