

# Homework Assignment #17

Due Thu, April 4, 9:30am, in `~/share.dir` with read permission

## 1. Final Version of Your Main Project Program:

Use my comments to your earlier versions of your main project program and notes on your flow chart and changes we discussed in office hours. For some of you, you will also need to continue revising and using your flow chart for finishing your program. The deadline for your final version is at the beginning of class. "Final" version, means that it will be graded, but most likely all of you will continue revising your program.

As always, please feel free to come for questions. Office hours are always MWF 2-3, T 4-5pm, for other times when you might reach me in my office, please see my schedule and we can also set meetings or as always, you can just come to my office. You all have been diving deep into your projects and I hope that you enjoy having entered the phase of analysis and getting results.

By Tue, April 4, 9:30am, put your python-program in your `~/share.dir/` and give read permission.

## Future:

- April 9: Results Section of Paper. This includes Figures fulfilling requirements as discussed in April 2 inclass work, and text added to your main project paper, defining what exactly is shown on each figure (and/or listed in table(s)) and interpretation of results.
- April 11: Abstract
