

Homework Assignment #8

(due Feb.19, 9:30am)

Final Version of First Main Project Paper

For further details on the main project paper see our webpage and second and third pages of homework # 6.

The first main project paper should include **the title, the “introduction/background”, the “model/method” and the “references”**, which are cited in these parts of the paper. Note, that this is not yet the complete paper, sections like the abstract, results, and conclusions are **not** yet in this first paper. For the revising of each of these sections use my comments to your latest versions of model/bibliography and introduction/background. For the paper use a more formal writing style than you will use in your oral presentation. **Use latex for writing your paper.**

Please use all my comments on your previous version (and if specified also on earlier versions).

At the beginning of next class, Tuesday, Feb. 19, hand in:

- hardcopy of your “final version” of your first main project paper (via latex)
- hardcopy of your previous “first version of your paper” with my comments. If specified on your paper, also previous model/bibliography & introduction/background sections with my comments.
- electronic copy of your final version of your first main project paper as pdf-file in your `~/share.dir/` (please give read-permission).

Upcoming Deadlines:

- Feb.21: Flow Chart 1st Version for Main Project
- Feb.26: Mini-Project I (Note: got shifted, now Tue)
- Feb.28: Main Project Talks (Note: got shifted)
