Your goal is to learn a little more about Euler. To our next class meeting, bring along a biographical sketch (on a single sheet of paper) containing the following information:

- date of birth/death
- country of birth
- country/city in which major work was performed
- year(s) during which major work was performed
- brief description of contribution

In your readings, list any contemporaries and also include seven (7) interesting facts about their life.

Be sure to state your references and other sources of information.
