Daily Assignment

due: Monday, February 12, 8 am

read: copies of two articles

Hand your answers to the following questions back to me via email (kvollmay@bucknell.edu) or as hard copy.

Monday we will start a new topic: traffic flow.

1. Search in articles, books or on the web for a traffic flow model. Write a brief (3-4 sentences) description of the model you found. On Monday everybody will present what they found.

The following two questions are a guideline for reading the two articles.

2. What causes traffic jams?

3. Which quantities are used to describe traffic flow. (We will “measure” these quantities later for a specific model.)

4. What was most difficult of this assignment and the last classes and/or what was most interesting?
