#### 1. To Hand In:

- (a) Homework 4 is due on 2020-02-17

### Jupyter notebook on lab computers

- Create a directory in your **private** netspace directory for your notebooks
- Download StartNotebook.bat and save in your private folder. Rename StartNotebook.bat.txt to StartNotebook.bat
- Select Start Menu→Anaconda3 (64-bit)→Python3 Set Path (optional?)
- Double-click the StartNotebook batch file.
