

Homework Assignment #7

(as email due: Tuesday, February 12, 8:30 am)

1. Hand in your final version of your bibliography/model:

- bibliography, i.e. list of references
- hardcopy of most important paper(s) and/or bookpage(s) etc.
- precise notes on the model you will use

Main goal is that you will know your model well enough, that you could start writing the program for it. Use my comments on your first version of your bibliography/model. Please hand in this part of this homework as hardcopy at the beginning of class.

2. On Tuesday, you will present in class an update on your background (and model) reading. (No answer by email necessary for this question.)

3. Finish together with your group partner the In-Class Work: Game of Life 3b (Newcomers) // 4b (Advanced). Put your program in your share.dir and make it readable. Please do this for one person per group and let me know in whose share.dir I can find your program and who the two group partners were.

4. **Comments:** Please give me **feedback about having the Newcomer/Advanced in-class work**. It means for me considerable more course preparation time and therefore I would like to know if you do prefer that we continue with Newcomer/Advanced in-class work or if you prefer to go back to one set of in-class work.
