

Homework Assignment #3

(as email due: **Tuesday, January 27, 8:00 am**)

Please emails (kvollmay@bucknell.edu) only as text (no word doc., pdf-file, etc.)

- 1.** Finish today's in-class work 3., 5. and 6. As answer to this question email to me the names of your programs and copy the programs into your share.dir directory and make them readable. I will check your programs, so please let me know as soon as possible, once you finished your programs.
- 2.** Read about arrays and also how to pass arrays on to user-defined functions in C++. As answer to this question keywords and/or an example are fine.
- 3.** Keep working on the bibliography/model of your project. I do not need to see an answer to this question but you do have to steadily work on your project. If you have not yet seen me in my office, do so. Bibliography & model will be due Thursday, January 29.
- 4. Comments:** What of this assignment was most difficult and/or most interesting? Do you have any comments about last class and/or this course?
