

Homework Assignment #6

(as email due: Thursday, February 5, 8:00 am)

1. Hand in your final version of your bibliography/model, which will be graded. As guideline for your revisions and further work on your project use my comments to your first version of your bibliography/model. As before for your first version, the final version on Thursday for the bibliography/model should include:

- references of at least five scientific papers which specify model & background of your project
- reference of at least one book
- any further references, which might be useful
- hard-copy of paper(s) which describes best the model you will use (In case of a book being your major source, just make a copy of the appropriate page(s). In case you will develop your own model, then make copies of the appropriate references which identify the main parameters and known facts you will use.)
- Describe model with as complete set of rules as possible (one or more pages.)

2. Continue reading the papers and books for your main project. You will give an update on your reading in seminar form in class on Tuesday, Febr. 10 (not Thursday yet, so that you have more time for the reading). On Thursday I do not need an answer to this part of the homework assignment, but you should keep working on your project because it needs many days of work.

3. Newcomers: Finish In-Class Work: Game of Life 1. & 2a,b and please put a (readable) copy of your program for 2a into your share.dir.

Advanced: Finish In-Class Work: Game of Life 2a-e and please put a (readable)copy of your program for 2e into your share.dir.

4. **Comments:** What of this assignment was most difficult and/or most interesting? Do you have any comments about last class and/or this course?
