

## Homework Assignment #8

(as email due: Thursday, February 19, 8:00 am )

**Read:** (see [http://www.eg.bucknell.edu/~kvollmay/caps\\_s2009/](http://www.eg.bucknell.edu/~kvollmay/caps_s2009/))

- hand-out about traffic flow [D. Chowshury *et al.*]
- hand-out about paper

**1.** On Tuesday we will start a new topic: traffic flow. As background reading, read carefully §I and §IIIA of the paper by Chowdhury *et al.*. Also look up other sources about traffic flow simulations. As answer to this question give a list of keywords of what you found. We will gather your findings on Tuesday in class.

**2.** Read carefully through the hand-out for the writing of your first main paper which will be due in one week (Febr. 24.) Please let me know in case of any questions.

**3.** Start working on your main paper. The “first version” (Feb.24) means I get to give you feed back the first time. You should aim for your “final version” so that I will be able to give you plenty of feedback. I do not need an answer to this question. I am happy to help you in case of any questions.

**4. Comments:** What of this assignment was most difficult and/or most interesting? Do you have any comments about last class and/or this course?
