

Assignments & Schedule March 5-24

March 5: (Assignment due 5pm) Please send to me the file name of your project II program and put your program into your share.dir and make it readable.

March 6: (Assignment due 5pm) Project II (traffic flow) paper.

March 7-15: Have a nice spring break!

March 17: class cancelled

March 19: You meet without me 9:30 – 11:00. Get together in groups of two and practice your main project talk. Give each other feedback about your talk and which parts of your talk/project are difficult to understand.

(Assignment due 11:00 am) By the end of class write a one paragraph summary of the talk of your partner. Write a second paragraph summarizing the comments you gave each other to improve your talk.

March 20: (Assignment due 5pm) Write the flow chart for the complete program of your main project. Be as detailed as possible. Make a list of the main variables of your program, e.g. necessary arrays. (After spring break you will dive into writing the program for your main project. Your programs might seem a bit daunting right now and this assignment helps you to chop the task into smaller tasks which you can then do easier. You find examples by looking at our classwork for the game of life and for the traffic flow model.)

March 24, 9:30 – 11:00 am: Main project talks: John, Rob, Brandon, Mark, and Deb

March 24, 7:30 – 9:00 pm: Main project talks: Kerry, Steve, Garrett, Kyle, and Evan
